Post Payments Faster and with Fewer Errors

Emdeon AccuPost accelerates the revenue cycle by automatically posting payments for virtually any payer that provides electronic payment files. Its flexible, automated features make it an ideal solution for hospitals and large physician practices with high transaction volumes. With fewer errors and faster posting, the financial benefits add up quickly, transaction by transaction.

Customized Posting Solutions

Perhaps the most compelling feature of Emdeon AccuPost is its tremendous flexibility. We realize every customer is unique. Our expert staff works closely with each client to create customized AccuPost solutions that interface with individual information systems and deliver the requested information.

Post More than Just Payments

To enhance the payment posting process, Emdeon AccuPost's interactive posting technology can also post the following:

- Contractual Adjustment Computations
- Rejection Notes
- Primary and Secondary Bill Dates
- Medicare and Commercial Claim Status Notes

This combination of features results in one very significant benefit—increased efficiency.

Automated Payment Posting

How Does AccuPost Work?

Emdeon AccuPost solutions are designed to each customer's specifications. The base application uses interactive posting methods, whereby ERA data is retrieved from payers and lock boxes, then posted to any Patient Accounting or Practice Management System.

Remittance reports, posted reports, and specialized menus allow complete control of the process, but still provide all the benefits of a decision-based automated posting application custom-designed for each client.

Features
